

LYTO™

LYTO™ Smart Shades for Smarter Shades

Innovative and versatile, Lyto™ delivers complete blackout at the push of a button. Its ideal for windows, doors, skylights, and privacy glazing. This sleek, adaptable technology enhances comfort and style.

Encased in a double or triple insulating glass unit, Lyto™ operates without mechanical parts, avoiding failures common in traditional blinds. Its ultra-thin shade activates in seconds via a small current, using electrostatic attraction for seamless performance.

Perfectly engineered for modern living, Lyto™ ensures durability, functionality, and seamless integration into any environment.

Benefits

- Fast, quiet deployment
- 10 months of battery life from a single charge
- PVC cell option for a customized experience
- Remote control for ease-of-use
- Multi-blind connectivity
- TOTAL black-out
- Zero motors or cords
- Advanced scheduling capabilities

APPLICATIONS

- Healthcare
- Education
- Hospitality
- Commercial
- Residential
- Retail
- Marine
- High risk institutions (government, behavioral health, correctional institutions)

HOW IT IS MADE

Lyto™ is crafted with cutting-edge technology, featuring an ultra-thin shade completely encased within a double or triple insulating glass unit. Unlike traditional blinds, Lyto™ contains no mechanical parts, eliminating potential failures. The shade activates in seconds through a small electrical current, creating an electrostatic attraction that bonds the shade to the glass surface, ensuring seamless and reliable performance.

STANDARDS AND COMPLIANCE

LYTO™ meets all ANSI safety standards, is FCC and UL approved, and built with ROHS compliant components

Current Size options
Maximum width 49 inches
Minimum width 12 inches
Maximum height 50 inches
Minimum height 17 inches
